TRAN PHUONG NAM

Full-Stack Developer

Hanoi, Vietnam | (+84) 989 634 277 | tranphuongnam.tpn@gmail.com
linkedin.com/in/nam-tran-phuong-hust | namtrandev.site | github.com/NamTranWL

Summary

Computer Science student at Hanoi University of Science and Technology with two web internships: frontend feature work on a production product-management platform at Vitex Software JSC, and a full-stack core-banking integration sandbox at OpenWay. Strongest in React/Next.js with TypeScript; builds and deploys backend services with NestJS, PostgreSQL and MongoDB. Looking for a Full-Stack Developer role where I can own features from UI to API.

Education

Hanoi University of Science and Technology **2023 – Present**
B.Sc. student, Computer Science *Hanoi, Vietnam*
Languages: Vietnamese (native) | English: IELTS 6.0, TOEIC 700

Technical Skills

Core	TypeScript, JavaScript, React, Next.js, Node.js, NestJS, REST APIs, PostgreSQL, MongoDB
Web & frontend	HTML5, CSS3, Tailwind CSS, TanStack Query/Table, Radix UI, i18next, NextAuth, Storybook, Figma
Familiar with	GraphQL (Apollo), Prisma, Redis, gRPC/microservices, Docker, CI/CD
Deploy & tools	Git, Vercel, Railway, MongoDB Atlas, AWS Lightsail, Caddy, Cloudflare Tunnel, Tailscale

Work Experience

OpenWay **Jun 2026 – Sep 2026**
Full-Stack Developer Intern (training & sandbox project) *Hanoi, Vietnam*
Project: WAY4 Client Portal, a core-banking integration sandbox | Live demo: way4intern.namtrandev.site

- Built client-creation and client-lookup workflows that connect a Next.js portal to a SOAP/XML WAY4 core-banking sandbox through a typed GraphQL gateway (NestJS + Apollo).
- Implemented and tested the backend service with Prisma, PostgreSQL and Redis, including JWT refresh-token rotation, token blacklisting on logout, rate limiting and role-based access control.
- Containerized the stack with Docker and Caddy, and linked cloud (AWS Lightsail) and on-premises sandbox components via Cloudflare Tunnel and Tailscale with no inbound ports opened (non-production).

Vitex Software JSC **Sep 2025 – Mar 2026**
Frontend React Intern / Trainee *Hanoi, Vietnam*

- **PlanZ AI** (production product-management platform, Nov 2025 – Mar 2026): added Excel/print export, real-time dashboard updates, and schedule/event management to an existing Next.js 15 / React 19 / TypeScript app.
- Turned Figma designs into reusable, responsive screens for schedules, notifications, events, settings and profiles using TanStack Query, Tailwind CSS, Radix UI, i18next, NextAuth and Storybook.
- Fixed Kanban and task-categorization bugs; blocked unauthorized direct-URL access to restricted pages.
- **Sportech** (web platform, Dec 2025 – Jan 2026): built the landing page and core pages in Next.js, including routing, i18n for multilingual content, and responsive components.
- Delivered assigned tickets within Scrum sprint deadlines alongside developers and designers.

Selected Projects

SportEnt – Sports Management Platform **Feb 2026**
Independent full-stack project | Live demo: sportent.namtrandev.site

- Designed and built the product end to end on my own: Next.js frontend, NestJS API, and a MongoDB data model for related sports entities.
- Set up CI/CD and deployed the frontend on Vercel, the backend on Railway and the database on MongoDB Atlas.

TIBIKI – E-commerce Platform **Jan 2026 – May 2026**
University group project | Source: github.com/NamTranWL/TIBIKI

- Co-developed an e-commerce platform with Next.js, NestJS and MongoDB; implemented the product catalog and checkout workflows.
- Split the backend into microservices that communicate over gRPC.
